Some fans have felt KotOR2 was missing somethings that would have made it an incredible game. So rather than just complain about it like everyone else has, a few fans have actually decided to do something about. They started working on adding features back into the game:

* The long-lost HK Droid Factory! (not the same as the Droid Planet M4-78) *

Several ways to murder Visas!

* A whole new group of people who want to kill you!

* Multiple endings! (no, really, actual endings)

* Various ways to be responsible for the deaths of all your party members!

So check out the downloads they have available and get ready to experience KotOR2 in a whole new way.
