The Republic Medium Cruiser is seen in both games, and is one of the most common ships within the Republic fleet. Many were used in the battle of Telos IV, as well as assaulting the Star Forge. The ship is 167 meters long, and has four double turbo laser batteries and four laser cannons. The vessel includes features such as a conference room, a medical bay, a bridge, crew quarters and escape pods. Examples of this class of ship are the Sojourn, The Endar Spire and The Harbinger.
