The Leviathan was Darth Malak's flag ship, and under the command of Saul Carath. The Sith Interdictor Class Cruiser is 600 meters long and can sustain a crew of 2,986 men, as well as 7,400 passengers. The ship is extremely well armed and armored. Its weapons include 20 quad laser cannons, 2 ion cannons, four turbo laser batteries, one tractor beam projector and two gravity well projectors. Its automated turret system makes it very effective at enforcing planetary blockades. The Leviathan holds a compliment of many Sith fighters as well as huge ground assault forces.
